As of September 30, 2008, approximately \$1.2 billion of outstanding receivables, representing approximately 20.98% of the total outstanding receivables in the Capital One Bank (USA), N.A. Small Business Segment at such date, related to accounts that were originated on or before December 31, 2001 and are not included in the table above.

The net loss rate is calculated by dividing the gross losses, net of recoveries, by the average amount of principal receivables outstanding for the applicable period. For the year ended 2003, however, the net loss rate excludes principal receivables outstandings during January 2003, which is based on data that is unavailable.

Annualized figures are not necessarily indicative of actual results for the entire year.

For pre-2007 originations, the origination date for each account is the date the solicitation to the accountholder was mailed. For originations beginning in 2007, the origination date for each account is the date on which the account is opened and an account number is assigned. However, for purposes of determining average principal receivables for all originations, including pre-2007 originations, the origination date for each account is the date on which the account is opened and an account number is assigned.
