As of December 31, 2006, approximately \$10.85 billion of outstanding receivables, representing approximately 24.68% of the total outstanding receivables in the Master Trust Portfolio at such date, related to accounts that were originated on or before December 31, 2000, and are not included in the table above.

The monthly principal payment rate for any month is calculated as the total amount of principal payments received during such month divided by the sum of (i) the amount of principal receivables outstanding as of the beginning of such month and (ii) with respect to accounts added to the Master Trust Portfolio during such month, the amount of principal receivables outstanding in such accounts as of the related addition date.

For each period presented, the principal payment rate is calculated as the average of the monthly principal payment rates during such period. For the year ended 2003, however, this calculation excludes the monthly principal payment rate for January 2003, which are based on data that is unavailable.

The origination date for each account is the date on which the account is opened and an account number is assigned.

For each account comprising the Master Trust Portfolio, performance data is based on the account's performance on and after the date on which such account was added to the Master Trust Portfolio.
